INDEX TO PRINCIPAL CONTENTS OF VOLUME 165

JANUARY TO JUNE 1981

A

Advantages of vacuum transfer printing machines 149
An aluminium acetate solution as catalyst in durable-press finishing 291
Applications of appearance analysis in the textile industry 299
Are benzidine dyes dangerous? 202
Ashutosh Fibre Division article on 6-acetyl amino-2-(ω-sarcosino)-3-sulpho-4-substituted phenylazo-1-naphthol dyes and their applications 190
ATYC's Plecsuau unit for knitted fabrics .. 184
Automatic control systems for dyeing machinery 299
Auxiliaries, new 51, 52, 77, 235

C

Capacity audience for Design for Survival conference 230
Continous dyeing research 9

D

Discharge printing of polyester – a practical approach 203
Dryer for tubular and open-width knitted fabrics 129
Dyeing and finishing in low liquor ratios .. 20
Dyer's Library 210, 235
Dyes, new 51, 52, 81, 235, 298

E

Effects of light and ultra-violet radiation on polymers, plastics and textiles 50
Electrical safety in the textile industry .. 43
Electronic measuring and control instrumentation 237
Energy audits 135
Energy consumption by finishing machinery 195
Energy savings in carpet dyeing 80
Energy savings in the dyehouse 83
Environmental monitoring 159

F

Fabric finishing plant and dyehouse open in Leicester 312
Finding economies in textile wet processing 17
Fluido-Jet for dyeing silk fabrics 257
Foam generator reduces costs in textile finishing 189

H

Hard pressed dyers and finishers 285
Health and safety so far as is reasonably practicable 27
Heat recovery from continuous washing machines 131

I

Increased efficiency with Arel control systems 101
Indosol dyeing system from Sandoz .. 305
Industrial mothproofing of wool with permethrin 19
Instruments and controls feature .. 84–104

L

Laboratory dyeing equipment 84
Leeds dyeing research – report to industry 185
Low cost imports cause industry's decline 18

M

MCS high temperature jigger for dyeing woven fabrics 323
Microprocessors – an aid to survival .. 288

O

Optimisation of exhaust dyeing processes through the use of computers and automation 307
Organic colorants – toxicological hazards and safe handling 250
Overcoming static electrical discharge from textile floorcoverings 44

P

Patents, new

Beam dyeing apparatus (1,583,298) .. 260
Carpet dyeing on winch beck (1,586,086) 313
Chrome dyebaths (1,579,923) 148
Continuous dyeing of staple fibre textiles (1,584,425) 262
Continuous high-pressure steaming (1,577,686) 147
Continuous pressing and decatising (1,579,795) 45, 258
Dyeing and texturising synthetic textiles (1,576,885) 206
Finishing of polyester fabrics (1,583,761) 261
Foams for dyeing and finishing (1,587,274) 315
Fulled/shrink-resist finish for knitted fabrics (1,577,009) 144
Impregnation cylinder (1,581,947) .. 143
Magnetic/heat transfer textile printing (1,581,561) 153
NASA fabric "handle" meter (1,587,274) 314
Radio frequency heating in dye fixation (1,588,513) 321

Reoxidation of sulphur dyes in continuous dyeing (1,575,963) 48
Scouring and bleaching emulsions (1,580,739) 46
Screen printing machinery (1,579,067) 143
Single-bath carpet process (1,583,161) 205
Tenter rail adjustment (1,577,277) .. 46
Textile finishing in foam (1,581,478) .. 207
Vacuum hood in pretreatment apparatus (1,576,904) 48
Winch-dyeing and rinsing apparatus (1,576,405) 105
Wool pad-dyeing process (1,575,227) .. 47
Wool/polyester printing techniques (1,583,261) 259
Physiological aspects of thermal comfort 204
Pigments for printing inks 204
Practical foam finishing 295
Presentation of SDC diplomas and medals 182
Pretreating yarns to enhance dye penetration 185
Printing prowess in Leicester 128
Product benefit with low pick-up finishing of cotton 181
Profitable alternative to rotary or jet printing 78

R

Recovering heat from process air 236
R. and D. in the current industrial climate 39
Role of clothing and bedding 40

S

Semi-continuous and continuous dyeing of cellulosics 300
Shrinkage of wool-containing fabrics .. 208
Slowdown in the Swiss chemical industry 183
Stenter pollution overcome at Basford Dyers 249
Stevenson's install first industrial fluidised-bed boiler 186

T

Textile finishing in the eighties .. 82
Tin-based textile treatments 187
The Colour Index or the past, present and (any?) future of colorant classification .. 256
Transfer printing papers 151

U

US dye output 125

V

Versatility with Brazzoli's new atmospheric machine 180

W

Wider markets and new developments for Pendle Velvets 79
Worldwide interest in Canadian wool treatment process 12

INDEX TO PRINCIPAL CONTENTS OF VOLUME 166

JULY TO DECEMBER 1981

A

An analysis of energy use in the textile finishing sector 3/16
Annual review of dyestuffs and auxiliaries 6/15-32
Anti-stat treatment for wool carpets .. 6/10
Aquatex wet processing units from Mather & Platt 2/20
Auxiliaries, new 2/38, 6/20

B

Basic principles to reduce handling costs 3/40
Beneflow CBS from prototype to production 2/33
Bradford University to drop colour chemistry? 5/10

C

Calator form UK subsidiary 5/10
Catalytic treatment of trade effluent and noxious odours 4/29
Clearwater plant installed in Jordan .. 3/44
Colouration activity keeps wool textile products to the fore 2/14
Commission printing company formed .. 4/9
Companies surprised by level of inquiries at Filtech '81 exhibition 4/21

D

Depressed demand affecting fibre prices 1/10
Development of new industrial coal burning systems 5/30
Developments in dyes and dyeing – 1977 to 1981 .. .. 6/15
Dow surfactants test results 6/10
Dyehouse handling, storage and warehousing feature 3/32-42
Dyehouse services, water and effluent treatment feature 4/29-35
Dyeing and finishing machinery review 2/16-33
Dyer's Library 2/44, 3/44, 5/41
Dyers' Association absorbed by CBWT .. 6/9
Dyes, new 2/38, 6/27

F

Fibre prospects 4/42
Fire dangers from electrical equipment in the textile and dyeing industry 2/36

G

Gas boiler success at Hunsworth Dyeing 5/35
German finishing industry reports reduced 1980 turnover 2/12

H

Hoechst UK open new northern region headquarters 1/19
How improved working conditions can lead to cost savings 3/32

I

Importance of design and colouration in the carpet industry 3/45
Indian research into energy saving .. 4/12
International regulation of chemicals – implications for organic colorants .. 5/15
Is there a future for European textile printing in the 1980s? 2/34

M

Meeting widely fluctuating steam loads 5/37

N

New British dyespring manufacturers .. 6/32
New concept in effluent treatment .. 2/28
New hank dryer for carpet yarns 2/22
New possibilities for the after-clearing of dyed polyester fibres 1/14
New shade costs may be reduced .. 5/9
New type of printing blanket 6/10

O

Opportunities for improved use of energy in textile finishing 4/14

P

Pad/steam versus jet dyeing 5/18
Patents, new
Ammonia removal in fabric treatment (1,589,409) 2/40
Batch fabric processing machine (1,587,069) 1/21
Continuous dyeing of polyester textiles (1,589,478) 3/22
Continuous one bath steaming/fixation (1,587,619) 1/20
Continuous processing at high temperature (1,594,518) 3/24
Continuous washing of tubular knitted fabric (1,595,867) 5/46
Dyeing modified polyester and wool mixtures (1,595,984) 5/45
Fabric abrasion resistance testing (1,591,019) 2/41
Folding and packaging knitted goods (1,592,988) 5/44
Integrated wet heat transfer printing (1,594,629) 4/41
"Isothermal" dyeing in jet machines (1,590,064) 2/43
Liquid-phase heat transfer printing (1,589,292) 1/21
Low liquor ratio dyeing apparatus (1,594,059) 4/40

Moisture content in finishing and pre-shrinking (1,595,758) 4/38
Opening and spreading system (1,594,808) 5/45
Polyester dyeing process (1,589,397) .. 1/24
Radiation techniques for shrink-proofing wool (1,593,123) 3/20
Size removal from fabrics (1,592,684) .. 3/21
Sliver dyeing in cans (1,595,725) .. 5/47
Squeezing liquid from textiles (1,593,396) 3/21
Stain removal from textiles (1,589,652) 4/39
"Tack spun" textile techniques (1,586,702) 1/23
Printers in receivership now trading profitably 4/12
Progress and productivity in colouration 4/19

R

Receiver called in at L.B. Holliday 4/10
Roaches develop thermosol to complement pad/steam units 2/23
Rotaire dye testing equipment 2/28

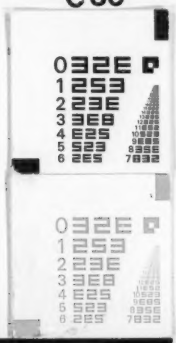
S

Scheme for ICI dyes intermediates .. 5/23
75th anniversary of Naphtanilide manufacturers Rohner 6/14
Shrink-resist plant goes into operation .. 5/24
Silk processing "breakthrough" via special Italian machines 2/31
Society of Dyers and Colourists biennial symposium 4/19, 5/14
Special features of widely used Dytex machine 2/21
Speed and efficiency in drying machines 2/16
Steam raising and boilerhouse equipment feature 5/30-40
Struggle for British carpet manufacturers 4/27
Sulphur dyes today and tomorrow .. 5/20
Swiss chemical industry reports excellent results 6/9

T

Taybridge Dyeing will serve Scotland's textile industry 3/14
The complexities of hat dyeing 2/37
The use of colour physics in a modern dyehouse – a user's experience .. 5/17
Therma-Stak heat recovery units reduce finishers' fuel costs 5/36
Transfer flocking 2/35

U

Upgrading trend evident at International Carpet Fair 4/23


C30
